TESTIMONIALS

“WCW worked magic on my confidence, my passion for excellence, persistence and taking calculating risks. I have increased the workforce/labour of the out-grower scheme from 300 to 1,250 registered farmers since I enrolled in the programme a year ago.

“What makes this program special is that it taught me to work on my business instead of working in the business. It allowed me space to check in with myself first as a driver and helped to look at my business in different views so that I can come up with strategies to grow.

Women Creating Wealth (WCW) is a Pan African entrepreneurship development programme that has significantly grown the businesses and transformed the behaviours, skills, and confidence of women entrepreneurs.
